## Better Results in Less Time.

Analyzing commercial bank fees is a critical treasury task. Are your bank bills 100% accurate? Are you getting the best possible rates? Are you using the best mix of services? Every cash manager knows they should audit their bank statements, but who has time to manually comb through thousands of line items every month? ...Nobody.

### That's why you need BRMEdge.

BRMEdge automates bank fee analysis for better results in less time. The system automatically retrieves, processes, and reports on all your statement data to resolve every possible billing discrepancy. Advanced automation and intuitive navigation streamline the analysis process so you can be more strategic with your time. You'll gain a comprehensive window into your treasury operation that saves money, increases productivity, and enhances control.

The award-winning BRMEdge is built on over 20 years of unrestrained input from the world's largest companies – companies like USPS, General Electric, and over 40% of the Fortune 500. Available On-Premise, SaaS, or Outsourced, BRMEdge is backed by world-class customer support and a team of passionate professionals recognized for their account analysis innovation and expertise.

So what are you waiting for? Get the **Edge** on your bank fees today!

2275 Half Day Road, # 160 • Bannockburn, IL 60015

### Productivity.

BRMEdge literally runs itself. Simply tell the system when to work and it will automatically capture statements, identify discrepancies, and report the findings. BRMEdge will even notify your banks of billing errors and post fees to the GL. It consolidates, prioritizes, and tracks every discrepancy through to resolution. And because the system processes 822 & BSB electronic statements, there is no data entry.

### Savings.

With BRMEdge, you'll never overpay your banks again. The system looks at every detail of every statement from every one of your banks. It compares actual to expected charges, validates all bank calculations, and even downloads TWS service volumes to flag over 30 audit violations. Compare services, banks, and benchmarks to enhance negotiations. Gain operational insights to optimize service usage. Achieve total treasury transparency for maximum savings.

### Control.

BRMEdge puts you in the driver's seat. Want to budget future fees or model "what if" scenarios? BRMEdge can do that. Want to allocate fees to business units to enforce internal controls? It does that too. From customized reports to detailed audit trails, BRMEdge lets you control the analysis process from start to finish.
